DROPOUTS AND POORLY PREPARED STUDENTS NEGATIVELY AFFECT THE ECONOMY

- Over 23,900 students did not graduate from Nevada's high schools in 2010; the lost lifetime earnings in Nevada for that class of dropouts alone total over **\$6.2 billion**.¹
- Nevada could save as much as **\$230 million** in health care costs over the lifetimes of each class of dropouts had they earned their diplomas.²
- If Nevada's high schools graduated all of their students ready for college, the state could save as much as **\$25.8 million** a year in community college remediation costs and lost earnings.³
- Nevada's economy could see a combination of crime-related savings and additional revenue of about **\$78.4 million** each year if the male high school graduation rate increased by just 5 percent.⁴

BUILDING AND USING COMPREHENSIVE STATE DATA SYSTEMS ARE CRITICAL TO DRIVING IMPROVEMENT

- Nevada has in place **8 of the 10 elements** recommended by the Data Quality Campaign (DQC) as the start of a robust P–12 longitudinal data system. To date, only 12 states have all 10 elements in place.⁹
- Nevada also has in place **1 of the 10 fundamental steps** recommended by the DQC in order to change the culture around how data is used to inform decisions on improving system and student performance. To date, no states have taken all of the fundamental steps.⁹

OVER THREE QUARTERS OF STATES HAVE ADOPTED COMMON CORE STATE STANDARDS

Nevada is one of 48 states that participated in the development of common core state standards in English language arts and math. **It adopted the standards in June 2010.**

NEARLY HALF OF THE NATION'S DROPOUTS ARE CONCENTRATED IN LESS THAN 2,000 HIGH SCHOOLS

These high schools have an extremely low promoting power of 60 percent or less, meaning that only 60 percent or fewer of freshman progress to senior year on time. Promoting power is a good estimate of the school's graduation rate. Generally, these schools have high proportions of minority and/or low-income students.

	Number of Federally Reported High Schools ¹² (SY 2007–08)	Number of High Schools with Low Promoting Power ¹³ (three-year average from 2006 to 2008)
Nevada	86	38
Nation	15,675	1,883

An additional **14 high schools** in Nevada have a promoting power between 60 and 70 percent.¹⁴

Over **one third** of the nation's low-promoting-power high schools were identified as making Adequate Yearly Progress during SY 2006–07.¹⁵
